We were still at a point where we could not reset our alarm from the keypad which did concern me. After sensing my concern, the customer service rep talked to her service manager and they dispatched an outstanding Technician to our house. He repaired the damage within 20 minutes and we were back to normal. I am a raving fan of SafeTouch. He was very knowledgeable about how the system worked and answered any and all of the questions we had about what he had installed for us. Also he took a lot of pride in what he was doing and did an outstanding job in doing. Joe did a create a reprogramming my system today. He is extremely knowledgeable about the products and technology. If Joe is your technician you are in great hands! We had service upgraded in a commercial building and appointment was for 8 am and Tech arrived 15 minutes early. Tech was very professional and completed the upgrade in a timely manner. Tech also took the time to make sure we understood the alarm system, went through all features and made sure he answered any question we had. If we have any future service needs hope to see him again. We upgraded to wireless security and he was very patient as he explained how to add the app to our phones, and gave me a very well done personal training session on the details of the Safe Touch home page. Now ready to move on with further installation of cameras. I recommend Safe Touch to anyone considering security for their home or business. Thomas and Clay were our techs and they were both

awesome. Thomas was the senior tech and was training Clay. Thomas was very professional. He explained everything to me and my husband. Both Thomas and Clay were very personable and helpful. Thomas was very knowledgeable about Safetouch and the equipment. Its why I love Safetouch. Their techs are more than techs. They are also customer service and help desk. Thank you Thomas and Clay! Placed a call to SafeTouch and they had a technician at our site the next morning.http://favoridugunsalonu.com/userfiles/cz-1500-manual.xml

Joe replaced the sensor and verified the operation. Quick response and great service! We had service upgraded in a commercial building and appointment was for 8 am and Tech arrived 15 minutes early. If we have any future service needs hope to see him again. Placed a call to SafeTouch and they had a technician at our site the next morning. Quick response and great service! The technician was knowledgeable and courteous. He was able to answer all my questions and get the system up and running in no time.I was referred to Smith Thompson by a friend after expressing frustration with some of the larger brands that lock you into a 3year contract. Within these pages, you'll find topics that range from design features and components to disarming and silencing alarms to fire safety. Our security consultants have the answers. Capable of up to 8 hardwired zones out of the box and expandable up to 32 wired or wireless. The DSC Power 1832 model offers four possible area partitions and can accommodate up to 48 user entry codes. We offer many different kit combos for this system in particular since it is our most popular.

https://congviendisan.vn/vi/elmo-model-p10-manual-0

It is a great choice for most average sized homes or small businesses. The 1832 is the most popular of the PowerSeries panels. The PC1832 panel has 8 onboard hardwired zones. The panel can be expanded up to 32 total zones. This can be done using PC5108 zone expander modules. The PC5108 adds 8 hardwired zones. With 3 of the PC5108 boards you can reach the max of 32 hardwired zones. But the PowerSeries is a hybrid system that can be expanded to support wireless devices as well and can have all 32 zones be wireless or any combination of hardwired and wireless up to 32 total zones. To add wireless capability the system needs to have a wireless receiver module attached. This is most commonly done with the RF5132 wireless receiver module. It can either be added as a standalone module or as a builtin component in a keypad as in the RFK5500 or RFK5501. Remember that while it is convenient and budgetfriendly to have the wireless receiver built into the keypad, it will also limit you on the placement of the wireless receiver to where you need to place a keypad and not necessarily in a very ideal location to receive signals from wireless devices. This is often not an issue though. PGM 1 is a lowcurrent output that can handle 50mA. PGM 2 is a highcurrent output that is limited to a much higher 300mA of current. The PGM outputs are useful for many things, but they are generally used for smoke detectors. If you need additional PGM outputs DSC has two modules that can be added to the system for the purpose of expansion. The first is the PC5208 which adds 8 additional PGM outputs that are current limited to 50mA. The other is the PC5204 power supply module. This module not only adds 4 highcurrent PGM outputs, but also acts as an additional power supply that adds an additional 1 amp of power. The PC5204 does require its own power transformer PTC1640 and backup battery BD412 . A PTK5507 touchscreen keypad is a fairly power hungry device that requires up to 300mA of power.

Just that one component takes up nearly half of the available power on the main panel. You can see how you can quickly you could need to provide additional power when you take into account a communicator, motion detectors, smoke detectors, keypads, and other powered components. Many installations with a PC1832 will not require an extra power supply, but it is definitely something to watch for. So if you wanted to be able to arm a few different areas separately; maybe a shop, office, and main home for instance; you could. This gives you the ability to monitor lower traffic areas or separate buildings or even different areas within one building without having to arm the entire system. The best part is that if any one partition is put into an alarm state, the entire alarm system will follow suit all sirens and communications will occur as normal. The first kit is the Kit32power5CP01NT. This is the most budget friendly of the 3 kits. Like all of the kits it comes with the 1832 board and cabinet, 15 watt surface mount indoor siren, and RJ31X telephone jack and cord set. This kit comes with a BD412 4 amp hour, 12 volt backup battery. DSC has also included their LC100PI motion detector. This motion detector uses passive infrared to detect motion. It can also ignore most pets up to 50 pounds. The last item included in the kit is the PK5501 fixed message LCD keypad. This kind of keypad is often best used as a secondary keypad. Although the keypad helps keep the price of the kit down, it can make programming and troubleshooting much more difficult because it does not show as much information as a full alpha numeric keypad such as the PK5500. This kit also has the basics included with the 1832 board and cabinet, 15 watt surface mount indoor siren, and RJ31X telephone jack and cord set. This kit has a BD412 12 volt, 4 amp hour backup battery. The final part is a PK5500 programmable alphanumeric LCD keypad.

This kind of keypad is great for doing your programming and troubleshooting as it can actually give you a custom display that can show much more information than the PK5501 style keypads. Additionally, this keypad can quickly give you access to any partition on your system. And it can of course allow you to assign labels to zones. This kit is in many ways a mirror of the first kit. It comes with many of the same components 1832 board and cabinet, 15 watt surface mount indoor siren, RJ31X telephone jack and cord set, BD412 backup batter, and LC100PI motion detector. The difference is that this kit comes with the RFK5500 LCD keypad. This keypad is part of the 5500 line

of programmable alphanumeric keypads. And it also has a builtin RF5132 wireless receiver that will instantly upgrade the PC1832 to have the ability to add DSC's 433MHz oneway wireless sensors. Clear the detector of smoke and repeat the sequence to reset. Then unplug the panel transformer if you know where it is. It is a beige or black box plugged into a nearby power outlet. If you can't find it, then disconnect the wire on the far left terminal of the terminal strip the first 2 terminals on the left are AC power. We also offer commercial security technical support specialists for further assistance. We help companies protect their employees, customers, facilities and operations from internal and external threats, and allow business to work smarter through enhanced security management and information management solutions.All rights reserved.By continuing to use our site you agree to the use of cookies in accordance with our policy. How To Test Your Alarm System Locally If you would like to verify that your Power, battery and siren are fully functioning, you can perform a local system test in the user menu section of your alarm system.

The panel will perform the following; activate the Siren, keypad buzzer and all keypad status lights for 2 seconds, test the backup battery and transmit a reporting code to the central station. How To Program Time and Date To Program Time and Date you will have to enter the user menu section of your alarm system. Below is a detailed list of all possible troubles on your system. If light 1 stays on, it indicates you have a low battery condition, and need to replace your system battery. If another number shows on your keypad, please contact Safetech Technical Support. You can check that the transformer has not been unplugged, or that any service is being done to the power in your area. If the problem persist, contact technical support for further assistance. If this trouble is present, make sure you have a dial tone on your phone line, ensure that your phone company is not working on the phone lines, as well as making sure no other devices are tying up the line like a fax machine, or DSL modem. The system will attempt a number of times to send a signal, after all attempts have failed to reach the central station, it will display this trouble. Once you know which zone number is in trouble, check that the physical contact has not been tampered with for the particular zone, if everything appears to be normal, contact SafeTech technical support. Once you have verified the zone, check to see if the contact has been physically tampered with, if everything appears normal, contact SafeTech technical support for further assistance. How to Disarm Your Alarm System The user must enter through a door programmed as Delay. Upon entering, the keypad will emit a steady tone, and emit a pulsing tone during the last 10 seconds of entry delay to alert the user to disarm the system. Enter a valid user code to disarm the system. How To Arm Your Alarm System Away Arming The Ready light must be ON to arm the system.

If the Ready light is OFF, ensure all protected doors and windows are secure or bypassed. To arm the system in the Away mode, either press and hold the Away function button for 2 seconds or enter a valid user code and leave the premises through a door programmed with entry delay. Upon arming, the Armed light will turn ON. If the Audible Exit Delay option is enabled, the keypad will beep once every second during the exit delay, and three times a second during the last 10 seconds to alert the user to leave. Stay Arming The Ready light must be ON to arm the system. If the Ready light is OFF ensure all protected doors and windows are secure or bypassed. To arm the system in the Stay mode, either press and hold the Stay function button for 2 seconds or enter a valid user code and stay within the premises do NOT violate a door programmed as Delay. Upon arming, the Armed light and Bypass light will turn ON. If the Stay function button is used, the keypad will not beep during the exit delay. If a user code was used, the keypad will beep if the Audible Exit Delay option How To Program A User Code LED Keypad. The Program light will flash. The keypad will turn ON the corresponding zone light to indicate a user code is programmed. Enter the 2digit user to be programmed. The zone light will flash. Enter 40 and the new 4 digit master code. Scroll to the user you would like to delete, or enter the 2 digit user number. The Bypass light will flash. The keypad will turn ON the corresponding zone light to indicate a zone is bypassed. To bypass or unbypass a

zone, enter the 2digit zone number. The Bypass light will be ON if any zones are manually bypassed. If the Code Required for Bypass option is enabled, enter a valid user code. All Rights Reserved. Customer Reviews 4.5 Based on 265 reviews See all reviews Write a review 4.6 Based on 76 reviews See all reviews Write a review Eli our technician was personable, professional, educational and thorough in both the installation process and walking us thru features of the system. Our whole EMC Security experience was excellent. And we love the low monthly rate compared to others. Robert C. I had EMC for 10 years in my previous house, moved to a townhome and they came and installed the system. I am very satisfied with the service and fast response of the staff. Patricia J. Just established with EMC after moving to a new home. They were efficient, professional and made sure I understood how the system worked.

The billing department also followed up to confirm billing details and to ensure I didnt have any questions. Overall very positive experience so far. Michael Z. EMC does a Great job!Had them activate my old system and less than a month later, had them upgrade keypads and control unit. A much simpler and more informative system to use. Harvey P. EMC Security did an excellent job installing our security system. The installer was very knowledgeable and courteous and took the time to explain the system to me and answer any and all questions I had. I highly recommend EMC Security. Nicki B. the serviceman was so helpful and friendly.Deborah Bagley M. the staff was very pleasant to deal with and very helpful. Doris K. I love EMC Security!!! The guy that came to our house was very professional and explained everything to us.he made sure all zones were working.great personality. We set off our alarm and I love the way they text you AND call you to make sure everything was OK. We were especially impressed by the installation technician Mr. Bobby Moore. Zero pressure for addons or upgrades, EMC representatives provided simple, concise solutions at extremely competitive pricing. We are very please with EMC Security! Bill G. The technician who got our system all up and running was very prompt, knowledgeable, friendly, and patient. We were pleasantly surprised how affordable our monthly security system would be. I've had the service like a month now. And I love how it sends me texts to let me know my alarm is disarmed or armed Incase I may have forgotten to set it. But if that happens I do have the advantage to set it on the app as well. I've done one test so far to see if they are getting a signal. KEN G. Very professional and courteous Larry C L. The prompt process of acquiring the security system and the simplicity of its use. It's easy. Dianne L. Easy to set and secure and it's easy installation Shelton W. Professional sales consultant and system worked out of the box.

Rhonda G. Love my new Alula security system. Was so easy to install. Would highly recommend EMC security. I had a bad sensor and they were great in trouble shooting to try to fix the problem. Diann

Arnold H. The staff is very personable and helpful. This is hard to find. Carol Wilkinson H. Very courteous and knowledgeable of the equipment and installation. Explained the operation and abilities of system in very understandable terms. Enjoyed talking with them and look forward to working with the company. Andy L. Relocated from NYC to ATL Douglasville GA 3years ago. Chatted with several security companies but EMC listened to my needs, and fully accommodated in creating a safety environment in my home. Today, I am still a happy customer still using my system purched and installed by EMC. I didnt feel pressured to purchase equipment and the technician took the time to explain everything to me. Technician answered all of my questions, and when I texted or called him for assistance afterwards, my Security needs were met. Everyone at EMC. customer service reps to the installation person have been very helpful and professional. I would definitely recommend EMC Security! SS L. EMC was recommended by a neighbor. Their sales staff was helpful, professional, and respectful of my stated needs never pushy. The installation technician was courteous and knowledgeable. I could not have been more pleased. Annette Q. EMC Security was the most cost efficient service I've ever used. Their technicians were very knowledgeable and courteous. I'd give them a perfect 10 for service! Judith M. Very personalized and actually listened to our needs. Prices are very fair, and they use their own techs unless behind. Salesman came to the house instead of phone sales call. Better than big companies on returning calls, or "no" calls on when the service is down. Emc is locally owned and makes it better than big competitors. Monitoring cost is lower than what we were paying for cellular coverage.

John B. great service and great price! Matt D. EMC security has superb customer service and it is a pleasure to speak with them about anything. They respond quickly and for those of us technologically challenged, provide excellent instructions. Pricing is great as well. I urge you to check them out for your security needs. Diane L. I have been with EMC for several years. I recommend them, among other things, for their trustworthiness, their reliability, their genuine customer care and for their professionalism. Situation My panel would not allow us to arm or disarm our system. Problem Tech could not come until Thursday. I accepted but also sent an email to EMC. Soon same day I received a call from NATALIE, who put me in contact with Customer Rep, JOHN, who sent out a masterful Tech, named MIKE, who is optimistic his actions resolved the issue. Thank you EMC Carolyn H. Love the new Security system at my house Walton EMC are neighbors and many people in my subdivision uses it. Installation was flawless and installer gave excellent instructions on use. We feel so much more safer at nights and when away from house and the video doorbell works flawlessly. Rick M. Always call quickly after the alarm goes off! Zoe M. I work with this company many years. I totally recommend it. The last time they came, I had another situation on the house, beside what he came to see, and John Arias Rosario was very helpful to figure out what was going on. Thank you very much John and EMC company. Rosangela V. Great experience. Technician made sure we understand the system completely and spent time to help insure that remote access worked. Mistakenly have set off alarm twice and received an immediate response. Very professional and understanding individuals who have been a pleasure to work with Paul W. No contract, quick response time, lowest monitoring price Ive come across and the customer service is outstanding. Jeanette P. There is no contract.

System is easy to install if you do it yourself. Monitoring and system are very reasonably priced. Using the Alula app you can arm or disarm from any where. Phyllis W. The simplicity is what got me. Nominal fee, basic coverage, alerts that work without wondering if someone is going to hack into my system and spy on my family. The gentleman who came and installed the system was extremely patient and helpful. A few days later when I forgot how to do something customer service not only walked me through the process, but snail mailed me literature too. Any issue Ive had has been quickly and friendly remedied. Im extremely happy with my service. Khristina A. S. R. No contract required. Easy to install we did the installation. Dan W. I recently moved and EMC Security is part of my electric utility coop, so I decided to add their alarm monitoring service to my existing alarm

system. From the sales rep to the technicians and everyone in between, I have been more than pleased with this company and their services. I have not had any alarms go off yet, but I'm sure that EMC Security will be just as good as they have been so far if they ever do! Josh M. It was an easy set up and no contract. Deborah Davis R. EMC security is first class all around. As a repeat customer with a second installation I can honestly say it was an excellent experience both times. From the moment I first called their customer service, all staff on hand are professional, courteous and always on time. They addressed all my questions and concerns and walked me through how to access and use my new system. Additionally, there followup post installation was a nice touch. Safety and security is important, having a reliable security company monitoring and protecting your family is priceless. I would highly recommend Jackson EMC to anyone. Carissa B. EMC security is first class all around. I would highly recommend Jackson EMC to anyone. Carissa B. EMC offers get service at a great price.

Response time is great when the alarm sounds. Makes me feel safe to know I have them watching my back. The technician that came to my house was very knowledgeable and polite, made me feel comfortable while he was there. Lorrie H. EMC offers get service at a great price. The technician that came to my house was very knowledgeable and polite, made me feel comfortable while he was there. Lorrie H. The best alarm service by far. The service is very affordable. No other company can provide the same services for such a low price. They are always available should you have any questions. Very easy to operate! Amy H. Every person I have ever talked to here is incredibly friendly and helpful. They are great and understanding people to have for my security. Marvin A. I recently had a home alarm system installed. I received excellent service from the initial phone call through the installation. They asked what I wanted and they listened. I highly recommend them. Kathi Clements D. Great service from start to finish. The installation was very professional, the service is reliable, and the personnel are knowledgeable and helpful Karen Schoonover M. The installation was smooth and great customer service. Lee C. Great pricing, great response time instantaneous, great customer service. Be advised that you MAY end up paying a little more than originally quoted if what you were promised doesn't work as expected with existing equipment. We were told we could connect to monitoring via WiFi. Installer shows up and explains that he CAN do that but the WiFi module they have will not fit inside our Honeywell system as I was told by salesperson. So he can do WiFi but it will require an additional "box" on the wall and additional wiring and plug in transformer. Other than that we're very happy and love that our cost is locked in will not periodically go up like cable service or trash pickup. Important to retirees on fixed income. Randy R. Was included as part of our HOA so price was right.
